Healthy Recipes

Staying healthy can be a challenge, but simple lifestyle changes – like eating healthy meals and being physically active – can help a lot. Research shows that these changes can help you maintain a healthy body weight and reduce the risk of chronic disease.

These recipes show you how to prepare tasty, healthy meals that help you develop a healthy eating pattern. A healthy eating pattern includes a variety of fruits and vegetables, fat-free or low fat dairy, various protein foods, and oils. It also means limiting saturated fats, trans fats, added sugars, and salt. Try these recipes as part of your healthy lifestyle.

Classic Honey Flan

A Heart-Healthy Recipe from the National Heart, Lung, and Blood Institute

Prep time: 5 minutes
Cook time: 45 minutes
Total time: 50 minutes
Number of Servings: 4

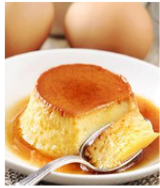

A heart-healthy twist to a classic dessert.

Ingredients

- Nonstick cooking spray
- 1 large egg
- 1/2 cup egg substitute
- 1 and 1/2 cup fat-free (skim) milk
- 1/4 cup plus 3 Tbsp honey, divided
- 1/2 tsp grated lemon zest
- 1 tsp vanilla
- 1/2 tsp ground cinnamon

Directions

1. Preheat oven to 325° F. Spray four ovenproof custard cups with nonstick cooking spray.
2. Prepare the water bath: Bring water to boil in a saucepan over medium-high heat.
3. Meanwhile, in a mixing bowl combine the whole egg, egg substitute, milk, 1/4 cup plus 1 tablespoon of honey, grated lemon zest, and vanilla. Beat until mixed, but not foamy.
4. In a separate bowl, combine 2 tablespoons of honey and cinnamon, and mix to blend well.
5. Place the custard cups in a baking dish that is large enough to accommodate them plus the water bath. Spoon 1/2 tablespoon of honey and cinnamon into each custard cup. Divide the egg mixture

Book

In her early twenties in New York City, diagnosed with bipolar disorder, Rachel Lindsay takes a job in advertising in order to secure healthcare coverage for her treatment. But work takes a strange turn when she suddenly finds herself on the other side of the curtain, developing ads for an antidepressant drug. Day after day, she sees her own suffering in the ads she helps to create, trapped in an endless cycle of treatment, insurance and medication. Overwhelmed by the stress of her professional life and the self-scrutiny it inspires, she begins to destabilize and finds herself hospitalized against her will. In the ward, stripped of the little control over her life she felt she had, she struggles in the midst of doctors, nurses, patients and endless rules to find a path out of the hospital and this cycle of treatment. This is the author's story of being treated for a mental illness as a commodity and the often unavoidable choice

U.S. National Library of Medicine

National Network of Libraries of Medicine

***RX: A Graphic Memoir* by Rachel Lindsay**
Discussion Guide

These are a few sample questions can be used to spark discussion in your book club.

Rx

A GRAPHIC MEMOIR

RACHEL LINDSAY

"With gallows humor and graphic energy that vibrates off the page, Rachel Lindsay shares the powerful story of her unraveling, and in the process, manages to knit herself back together again."

—ALISON BECHDEL, author of *Fun Home*

1. What do you think of the visual aspects of this book? How does the format of a graphic novel influence what is conveyed in this memoir?
2. Sections of the book discuss how people with mental health conditions are depicted in ads and media. What are some stereotypes from ads that you see reflected in real life marketing? How do these depictions influence the public view of mental health?
3. What aspects of your own life does the book remind you of? A particular event? Or a feeling? A person – like a friend, family member, co-worker, etc.? Can you point to specific passages/panels that struck you personally? Why?
4. If you've read other memoirs or stories about bipolar disorder (or mental illness in general), how does *RX: A Graphic Memoir* compare to them?
5. Most of us have an idea of what therapy and recovery should look like. How does *RX: A Graphic Memoir* challenge or reaffirm your personal image of what therapy, hospitalization, and mental health recovery is supposed to look like?
6. The book shows various interventions and attempts to help by Rachel's family and friends. What do you think of the intervention methods used by those closest to Rachel? What things do you find to be effective in supporting friends and family with mental illness?
7. When she receives a promotion at work, Rachel expresses a worry that people may realize that she has bipolar disorder. What are some factors (both stated and assumed) that feed into that fear?
8. How does Rachel's job at a pharmaceutical company affect how she views her own mental health?
9. What do you think the author's purpose was in writing this book? What ideas do you think she was trying to get across? What factors do you think may influence the author's message and telling her own story?
10. In what ways did the book change your own opinion of how you view bipolar disorder (or mental illness in general)?

Extension activity

Your book club can tap into their creative abilities by creating their own graphic medicine comic book. Book clubs can utilize materials from the National Library of Medicine exhibit "[Graphic Medicine: Ill Conceived & Well Drawn](https://www.nlm.nih.gov/exhibition/graphicmedicine/)" (<https://www.nlm.nih.gov/exhibition/graphicmedicine/>) for additional information and activity plans. The [Comics Making Project](https://goo.gl/05aF4r) (<https://goo.gl/05aF4r>) provides an activity plan for people to have hands-on interaction with telling their own story in a comic format.

This discussion guide was created by the National Network of Libraries of Medicine and does not reflect the views or opinions of the author or publisher. Created Spring 2019.

GRAPHIC MEDICINE

ILL-CONCEIVED & WELL-DRAWN!

Graphic medicine is the use of comics to tell stories of illness and health. Most graphic medicine is memoir, the author as patient.

The language of words and pictures gives approachability and emotional impact to these personal stories, and even to the clinical data they sometimes include.

HI!

READING WORDS & PICTURES

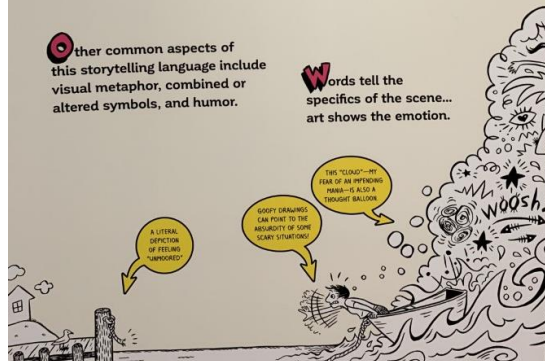

THE LANGUAGE OF COMICS

When reading (or creating) comics, the text and images work together to create meaning that neither conveys alone.

Other common aspects of this storytelling language include visual metaphor, combined or altered symbols, and humor.

Words tell the specifics of the scene... art shows the emotion.

Activity Station: Student Submission

MUSIC AND MOVEMENT

Music and movement are important at every stage of a child's development, and can be brought together in fun, dynamic library programs. Librarians already sing, clap, and play during storytime. Music and Movement deepen this tradition by bringing in physical activity.

CHAIR-BASED EXERCISE

Did you know that you can work your whole body without standing up? Chair-based exercises are great ways to make fitness more accessible to individuals with mobility problems. Yoga, Zumba, Cardio: You can do it all without getting out of your chair!

RUNNING

Running is one of the best things you can do for your health. Libraries help people start running through Couch to 5K programs and sustain this healthy habit through running clubs. These programs are great opportunities to form partnerships with runners in your community.

PARKS PARTNERSHIPS

Local, state, and national parks are all wonderful partners. By partnering with parks you can start circulating hiking backpacks, set-up StoryWalks®, take your summer reading outside, and encourage a lifelong love of being active in nature.

LET'S MOVE IN LIBRARIES RESOURCES

Let's Move in Libraries is the place for library professionals to share, learn and be inspired to develop excellent programs for their communities. This page contains general resources applicable to any library program that includes physical activities. Visit the [Program Ideas](#) page for resources specific to a particular program (such as Yoga Story Times). [Contact us](#) to add resources you have developed in your library!

SAFETY FIRST

Accidents are rare but they can happen during one of your programs. Protect your library by requiring participants to sign liability waivers. Participants (or their guardians) only have to sign a form once. These examples of liability forms used by public libraries throughout North America includes forms for Tai Chi, Exercise Classes, Yoga, Bicycling, Nerf Capture the Flag, Walking, and many other types of programs (UPDATE SEPTEMBER 2018 - More examples of Liability Forms: [Ex.1](#), [Ex.2](#), [Ex.3](#)). In the U.S., instructors of fitness classes in libraries may be required by your local government to have additional insurance coverage. Consult your city or county administrators for guidance.

Citizen Science Basics

Citizen Science Month - Resources for Libraries

Citizen Science Month is observed annually in April to celebrate and promote all things citizen science: amazing discoveries, incredible volunteers, hardworking practitioners, inspiring projects, and anything else citizen science-related! This global celebration includes events hosted by libraries, institutions, community groups, museums, and individuals all around the world.

The National Network of Libraries of Medicine (NNLM) has partnered with SciStarter to support Citizen Science Month in April 2020. In 2019, the two organizations worked collaboratively to promote Citizen Science Day in libraries, to increase awareness of citizen science in communities across the nation, and help individuals explore the impact of their environment on health.

In 2020, during the month of April, NNLM and SciStarter seek to host citizen science activities in

Providing Virtual Programming in a Health Crisis

Our buildings may be closed, but our libraries should be open. See how you can provide vital health programming to your patrons at little cost and without extensive technology. Join Tony Iovino, Assistant Director for Community Services for the Oceanside (NY) Library as he discusses how his library has already provided dozens of virtual health information programs for patrons of all ages. Topics discussed will be types of programming, technology used, staff training, use of outside experts, and how to present health programming at little or no cost.

Tony Iovino has been the Assistant Director for Community Services for the Oceanside Library since 2015. Prior to that, he was the head of litigation and managing partner for a law firm in Garden City, NY that he started in 1986. Tony received his undergraduate degree from the University of Richmond, his juris doctorate from St. John's University School of Law, and is currently enrolled at the University of Kentucky, seeking his Masters in Library Information Science.

Tony is a published author (Notary Public Enemy, Diversion Press) and poet. He served on the Oceanside School District Board of Education, and has served as a board member and attorney for dozens of non-profit and public boards. He and his wife of 40 years, Angela, have two grown daughters.

Kernel of Knowledge

The Kernel of Knowledge is an expert-speaker webinar series from the Greater Midwest Region which provides one-hour sessions on topics of interest to National Network of Medical Libraries (NNLM) members throughout the year.

Sessions are scheduled on an ongoing basis, check back often for upcoming presentations! All Kernel of Knowledge sessions are eligible for 1.0 contact hour of Medical Library Association continuing education credit.

Webinars from this series are recorded. Recordings can be found on the [main page for this series](#) or on our [YouTube channel](#)[®].

OCLC Virtual Town Hall: Libraries and the COVID-19 Crisis

A 90-minute virtual town hall exploring how libraries of all types are managing the impact of the COVID-19 crisis.

The COVID-19 crisis has created a strain on both the personal and professional lives of library staff everywhere. As libraries respond to rapidly evolving information and guidelines, building closures, and loss of resources, staff are considering new, virtual ways to connect with and support patrons and colleagues.

Join us for a 90-minute OCLC virtual town hall with a welcome from Skip Prichard, President and CEO of [OCLC](#). This live event will feature WebJunction and OCLC Research Library Partnership program staff and four guest panelists from public, academic, special, and school libraries who will share their experiences with the shifting landscape, including how libraries are moving services, programming, and learning online.
